About The Courage to Change

“*The Courage to Change matches up perfectly with the TRAS domains,*

and our officers utilize it for all high and moderate risk offenders on direct supervision. The training and ongoing support from The Change Companies® has been terrific and has helped us develop a successful tool to address criminogenic needs identified by the TRAS...

...I look at our relationship [with The Change Companies®] as more of a partnership than a client/vendor relationship.

-Allen E. Bell, Agency Director
Midland Judicial District CSCD

The Courage to Change Interactive Journaling® System is an evidence-based supervision/case management model developed in collaboration with several United States Probation Offices.

Through the use of this cognitive-behavioral *Interactive Journaling®* System and interaction with their support team, participants address their individual problem areas based on a criminogenic risk and needs assessment.

Implementation is flexible and can be customized based on risk, responsivity and programming needs.

By personalizing the information presented in the Journals to their own circumstances, participants will develop a record of their commitments and progress throughout probation and a roadmap to success in their efforts to make positive behavior change.
