## About Evince Clinical Assessments

Effective treatment starts with accurate assessment and diagnosis. In partnership with Evince Clinical Assessments, The Change Companies offers the industry's most complete system of clinically driven diagnostic resources.

Evince clinical assessment tools cover substance-related disorders and the most commonly occurring mental health conditions. The resources include a brief assessment and comprehensive diagnostic interviews.

These instruments support your organization with the necessary fidelity to ensure your staff is accurately assessing the individualized needs of program participants.

The **CAAPE-5** is a comprehensive diagnostic assessment interview providing documentation for substance-specific diagnoses based on DSM-5 criteria. In 30 to 40 minutes, the CAAPE-5 covers some of the more prevalent mental health conditions likely to impact recovery from substance use disorders and collects key demographic information associated with prognosis.

## Benefits:

- Consistent and efficient DSM-5-compatible diagnostic interview.
- Documentation of drug/alcohol-related problems.
- Indications of common mental health conditions.
- Demographic and clinical prognostic indicators.
- Helps meet accreditation requirements.
- Covers substance use disorders.

Item #: CT-V | Set of 25 | \$81.25

Manual: Item #: CM-V | \$24.00

The **DAPPER-3** consists of ratings covering the content of the ASAM Criteria to provide quantifiable measures of current status. Up to six ratings can also document progress or changes over time. The ratings form subscales to pinpoint problems and strengths in accordance with all six of the ASAM Criteria dimensions.

## Benefits:

- Appropriate for adults and adolescents.
- Focuses attention of those areas requiring the most urgent need.
- Provides a foundation for formulating reports and communication with other professionals.

Item #: DAP-T | Set of 25 | \$95.00

Manual: Item #: DAP-M | \$30.00

The **LOCI-3** is an excellent decision support instrument for treatment planning and placement. It provides comprehensive documentation of ASAM Criteria placement findings for both adults and adolescents.

## Benefits:

- Offers adolescent and adult versions.
- Documents clinical change during an episode of care on a single form.
- Provides sound, consistent placement documentation for reimbursement issues.

Adult Item #: LO-3 | Set of 25 | \$95.00

Adolescent Item #: LO-2R-Y | 25 | \$95.00

The **PADDI-5** is a comprehensive interview based on the DSM-5 for identifying co-occurring mental health and substance use disorders among adolescents. This interview enables both addiction and mental health professionals to document problems within their areas of expertise and make focused referrals for conditions outside their scope of practice.

Item #: PT-V | Set of 25 | \$81.25

Manual: Item #: SM-V | \$24.00

## Benefits:

- Fully compatible with DSM-5.
- Appropriate for both private practice and public settings: Administration (35 to 50 minutes) and scoring (less than five minutes) can be completed during a typical outpatient interview or intake.
- Convenient means of documenting and reporting findings.
- Administration does not require special training for licensed clinicians.

The **SUDDS-5** is a comprehensive interview that provides documentation of substance-specific diagnoses based on the DSM-5.

Item #: ST-V | Set of 25 | \$81.25

Manual: Item #: ST-MV | \$24.00

## Benefits:

- Can be completed in a single session or in segments over multiple sessions without losing the context of previous responses.
- Collects prognostic information relevant to ASAM's criteria.
- Respondent sign-off provides an option to have individuals attest to the accuracy of the information provided.

The **TAAD-5** is a brief, structured interview designed to identify current alcohol and other drug problems. This 10-minute assessment tool covers all DSM-5 criteria for substance use disorders. It offers high internal reliability. The TAAD-5 produces alcohol and drug use disorder profiles similar to those of more time-intensive instruments.

Item #: TA-T | Set of 25 | \$62.50

Manual: Item #: TA-MV | \$18.00

## Benefits:

- Offers a quick assessment of current substance use disorder criteria.
- Provides support for substance use disorder diagnoses in minutes.
- Documents negative findings for those individuals who do not report problems.

## Manuals

Manuals are designed to help facilitators engage participants and maintain program fidelity.
