Cognitive-behavioral series assisting youth in the process of prosocial change

It’s all about the little choices I make each day.
ABOUT

INTERACTIVE JOURNALING®

*Over 25 million* people have used Interactive Journals to make positive changes in their lives.

*The Change Companies®* collaborates with hundreds of professionals and providers to create program content, implementation methods, training options and outcome measurements.

*Interactive Journaling®* curricula are used in many behavior change fields, including justice services, substance use treatment, impaired driving, healthcare, mental health, prevention and intervention.

*Interactive Journaling®* is a structured and experiential writing process that motivates and guides participants toward positive life change. This evidence-based practice brings consistency to service delivery while keeping program participants engaged and focused on their personal change goals.
Forward Thinking is a cognitive-behavioral series that uses evidence-based strategies to assist youth involved in the criminal justice system in making positive changes to their thoughts, feelings and behaviors. Applying the information presented in the Interactive Journals to their own lives helps participants achieve their goals of responsible living. This series correlates intervention with the most commonly used risk and needs assessments.

Lyon County youth are benefitting from the [Forward Thinking] program... It has made many of the serviced youth self-aware of their issues that placed them into the system. The Journals have been an excellent medium to open, honest communication with youth who typically use passive compliance as a front to behavior change.”
